1   FAQ

Exercises can be done in groups.

- Not mandatory

2   The daily paper

Today we are going to get better at our craft, using the method: Learning through stealing. We are going to steal the design of an online newspaper and engineer the design in HTML & CSS.

Open a browser, direct yourself to:

- www.bt.dk

- www.weekendavisen.dk

- www.politiken.dk

Your task is to emulate & copy some elements from one of the front pages of these daily online papers using .html & .css

You have the freedom of choice to decide how detailed you want to copy the design. Meaning you can either:

- Copy 2-3 article elements from the front-page of e.g. www.bt.dk

- Copy more elements and experiment with creating a full-page layout.

- Copy more elements, create a full-page layout & make 1 page link to an article with a design as well.

Attach your inspiration-page + Screenshot of your result + HTML-code to fronter
